SUMMARY

Back-end developer focused on automation and systems integration. As a Systems Analyst at Gox Internet, I work with the ISP's ERP (IXC) and AI-powered WhatsApp assistants, build GLPI plugins and create internal tools that remove manual work from the support, HR and IT teams. My background spans infrastructure, front-end and ERP, which gives me an end-to-end view: server, database and the person using the screen.

EXPERIENCE

Systems Analyst IV — Gox Internet **May 2026 – present**

- Built Gox Assina, an electronic contract signing platform
- Optimized prompts and intent routing for the AI-powered WhatsApp assistants (OPA Suite), proposing an architecture with sub-assistants per category
- Created selfie-based facial verification (CompreFace) for contract confirmation over WhatsApp
- Developed GLPI plugins: a simplified ticket-opening portal and a workflow to revoke employee access during vacations
- Built an automated diagnostic agent for network instability complaints using ACS

IT Infrastructure Analyst V — Grupo Minas Port **Feb 2025 – May 2026**

- Development and maintenance of the company's own system in C# and .NET
- Took part in migrating the physical servers to Microsoft Azure
- N2 user support, resolving tickets escalated from first level
- Networks, firewalls and VPNs (Cisco, MikroTik, Sophos, pfSense, Fortinet) and Windows Server (AD, GPO)
- Monitoring with Zabbix and Grafana, backups with Veeam and rsync, Bash and PowerShell scripts

Front-end Developer — SGBras Telemetria **Feb 2024 – Sep 2024**

- Built a support ticketing platform from scratch (PHP, Laravel, MySQL)
- Evolved the Laravel (MVC) tracking platform, with dashboards and MySQL queries
- Worked with Galileosky tracker data and driver fatigue sensors
- Platform debugging, log analysis and customer support

ERP Systems Analyst — Mercantil Fonte Boa **Apr 2022 – Feb 2024**

- Support, setup and updates of the Consinco (TOTVS) ERP
- Oracle database management and access control
- Process automation with Python scripts
- Support for business area users

Helpdesk — HTF Apps **Sep 2021 – Apr 2022**

- N1 technical support by phone, chat and remote access
- Deployed document management with Alfresco Community, Tomcat 7 and PostgreSQL on Linux and Docker
- Built workflows for printers
- Migrated customer environments from Windows to Linux

IT Intern — Itaúna/MG City Hall **2021**

- Hardware and user support and network maintenance
- Raspberry Pi setup for internal solutions

SKILLS

Back-end: PHP, Laravel, C#, .NET, Python, Node.js, Java, REST APIs

Data: MySQL, SQL Server, PostgreSQL, MariaDB, MongoDB, Oracle

Infra & DevOps: Docker, Linux, Microsoft Azure, Windows Server, Git, Zabbix, Grafana

AI & Automation: AI-powered WhatsApp assistants (OPA Suite), Claude, OpenAI, API integrations, IXC Provedor, GLPI

Front-end: React, Next.js, TypeScript, JavaScript, HTML, CSS

EDUCATION

Bachelor's in Software Engineering — Anhanguera **2025 – 2029**
In progress · online

Associate degree in Systems Analysis and Development — Uninter **2025 – 2027**
In progress · online

LANGUAGES

Portuguese (Native) · English (Intermediate) · Spanish (Basic)

SOFT SKILLS

Proactivity · Communication · Teamwork · Time management · Attention to detail · Adaptability

COURSES & CERTIFICATIONS

- Claude Code in Action — Anthropic
- Introduction to Subagents — Anthropic
- Claude 101 — Anthropic
- O Curso Completo de Banco de Dados e SQL — Udemy, 58,5h
- Front End & UX/UI Design — Origamid, 82h
- JavaScript e jQuery — Origamid, 18h
- Construindo um Sistema para um Estacionamento com C# — DIO
- Introdução ao Git e ao GitHub — DIO, 5h
